DAYS HOURS MINS SECS

*Lindy Elkins-Tanton, Principal Investigator of the NASA Psyche mission, and professor at Arizona State University. Elkins-Tanton is a member of NAS and AAAS. Asteroid (8252) Elkins-Tanton is named for her, as well as the mineral elkinstantonite.*

A close-up, high-resolution image of the Psyche asteroid's surface, showing a dark, metallic, and highly cratered texture.

For the first time ever, we are exploring a world made not of rock or ice, but of metal.

Announcing a Public Lecture by Lindy Elkins-Tanton, PI of NASA's Psyche mission

## The NASA Psyche Mission: First Visit to an Unknown World

Wright Auditorium, Busch campus

6 PM, Wednesday April 16
