

Spring 2025 Courses in Communicating Climate Change

Looking to improve your ability to communicate climate change to others? Check out these Spring 2025 courses. While the titles may sound similar, each course has a slightly different focus and skill building process.

Graduate Course

Communicating Science with Decision-makers (34:970:631)

Mondays 6:00pm-9:00pm

This course will help you develop skills in communicating science and technical subjects, focused on communicating in the context of “decision-making”. You will learn to frame science within the context of complex and sometimes contentious external factors.

For questions or more information about this course, contact ashlyn.spector@rutgers.edu

Undergraduate & Graduate Course

Communicating Climate Change (11:670:415 & 16:460:611)

Wednesdays 12:10pm-3:10pm

Expand your understanding of climate science and climate change, while developing science communication skills to advance the public’s climate literacy. This course will combine science content, active teaching and learning methods, and how to engage in effective educational interactions.
