

## Default Question Block

# Application for RCEI Clean Energy Certificate

The Clean Energy Certificate equips Master's-level graduate students with cross-disciplinary training in engineering, policy, and economics through a clean energy scope. Developed in partnership with the New Jersey Board of Public Utilities (BPU), this 9-credit credential equips future leaders with the essential skills required to pursue public and private careers across the clean energy industry.

To be admitted into this certificate program, a student must:

- Be enrolled in or accepted to a Rutgers Master's program (matriculating student);
- Have a minimum graduate student GPA of 3.0 (B average);
- Undergraduate GPA will be considered for first-year Master's students.

For more information, please
